SUMMARY

Disciplined Frontend Developer specializing in React, TypeScript, and modern component architecture. Focused on building clean, performance-driven web applications with strict type safety and modular codebases. Driven by personal accountability, continuous technical growth, and delivering robust frontend solutions through production-grade internships and open-source portfolio projects.

WORK EXPERIENCE

Frontend Web Developer Intern – MMS IT (MMS One Stop IT Solutions)

April 2025 - Remote

Next.js · React · TypeScript · Zustand · SWR · Tailwind CSS · Zod

- Collaborated closely with UI/UX designers to build a high-performance **Mala POS System**, translating competitor analysis, low-fidelity wireframes, and user pain points into clean, type-safe UI components.
- Applied **Separation of Concerns (SoC)** and **MVVM architectural concepts** to isolate complex client-side business logic from presentation layers using Zustand state stores and custom React hooks.
- Engineered secure, type-safe data entry forms by integrating **React Hook Form** with **Zod** validation schemas to enforce strict data integrity before execution.
- Streamlined frontend-to-backend data flows, leveraging **SWR** for efficient data fetching and caching, while utilizing Postman to test, debug, and integrate API endpoints.
- Aligned client-side application logic with the backend engineering team, gaining technical exposure to Laravel, PHP, and Docker production environments.

CERTIFICATIONS

Frontend Web Development – MMS IT

June 2025 · ID: 1171E43A3A62

Focus: React, TypeScript, and modern web workflows.
